

solution electricfires

2024 - 2025

A new generation of highly efficient, authentic and stylish electric fires.

The focus of your living space, these fires have been designed and manufactured with optimal controllability of heat, light and sound as the critical elements. Controllable from your handset, via Alexa or through the app on your smart phone or watch, you can customise your fireplace to suit your individual taste. No electric fire, currently on the market, has the level of product features or attention to detail that Solution Fires have as standard, supported by a high level of genuine customer service. For more information about our products, please visit our website www.solutionfires.co.uk.

TrueFlame 150 3DX

Solution Fires have developed a pioneering, ultra-high-definition LCD fire that is redefining the electric fire market.

Featuring a state-of-the-art 4K LCD flame screen, the TrueFlame 150 3DX delivers a crystal clear image with cinematic qualities. Designed with meticulous attention to detail and using the latest technology, Solution Fires have developed 17 captivating visual concepts that include a variety of backgrounds, flame types and even a tropical aquarium.

To complement the large range of visual experiences on offer, the TrueFlame 150 3DX comes with a hand-crafted, premium real log fuel bed. A decorative stone fuel bed is available as an optional extra, designed to create a contemporary look for the gas flame or aquarium visual effects. The fuel beds are interchangeable, allowing the fire to be converted as desired. Furthermore, the rear flame screen is reversible, offering both a mirrored, reflective option and a smoked glass option that has anti-reflective properties. For optimum control, there are manual, remote and app capabilities built in to the fire.

Every detail of the TrueFlame 150 3DX has been cleverly engineered to deliver the most realistic visual experience. Featuring three preset flame heights in addition to the multiple colour and brightness functions, the TrueFlame 150 3DX can be customised to create an attractive optical aesthetic that enhances the ambience of any room.

Solution Fires - Revolutionising the Future of Electric.

Ways To Control Your Solution Electric Fire

Remote Control

All solution fires are supplied with an intuitive hand held remote control as standard. This handset allows you to control the whole range of audio and visual features specific to individual models.

The Solution Fires App

By downloading this industry leading app on Android and iOS smart phones and tablets you will be able to control a whole range of audio and visual features tailored for the Solution cassette fire range. Whether you're at home or on the move, you can conveniently control your fire.

Alexa

The Solution app allows users to control their fire through Alexa, using simple voice commands. This integration not only streamlines the user experience but also ensures that managing fire safety is more intuitive and efficient, whether at home or on the move.

Smart Watch

By integrating with smart watches, the Solution app allows for seamless, on-the-go control, enabling users to adjust settings, turn the fire on and off, and receive notifications directly from their wrist.

Setting The Ambient Mood

The visually stunning Solution iTronic technology not only provides one of the most realistic flame effects on the market but also gives you, the owner, incredible versatility. You can utilise the multiple preset options as illustrated below or customise the fire to suit your individual taste.

◀ Anti-Reflective Glass

Upgrade your fire with Anti-Reflective Glass for crystal clear clarity

Our Anti-Reflective Glass reduces reflections and increases light transmission, creating the illusion that there is no glass panel in the front of the fire. The addition of Anti-Reflective Glass completely enhances the visual experience by creating a crisp, well-defined view of the flame effect and fuel bed.

Anti-Reflective Glass is an optional upgrade for all SLE and LUX models (excluding **LUX650**).

Smoked Glass ▶

Upgrade your fire with our **NEW Smoked Glass Flame Screen**

Offering a reduced reflection in the rear flame screen, our newest upgrade option is both alluring and transformative. LUX Smoked Glass defines and enhances the flame effect and fuel bed, elevating the optical aesthetic and bringing a new level of sophistication to the LUX range of fires.

For the ultimate immersive visual experience, pair the Smoked Glass Flame Screen with Anti-Reflective Glass.

Smoked Glass is an optional upgrade for **LUX75**, **LUX100**, **LUX125** and **LUX150** models only. The **LUX650**, **SLE75**, **SLE100** and **SLE125** are all fitted with Smoked Glass as standard.

Scene Lighting

Our popular scene lighting feature allows you to create the perfect ambience. Powered directly from the fire and independently controlled via the remote control and solution app, it's an easy and efficient way to add another visual dimension to your suite, media wall or bespoke installation.

Choose from two options:

Scene Light Kit (2 x 1000mm, 2 x 500mm, 4 x 250mm LED Strips)

Scene Spot Light Kit (2 x 1000mm & 4 x 250mm LED Strips, 2 x LED Spot Lights)

Front

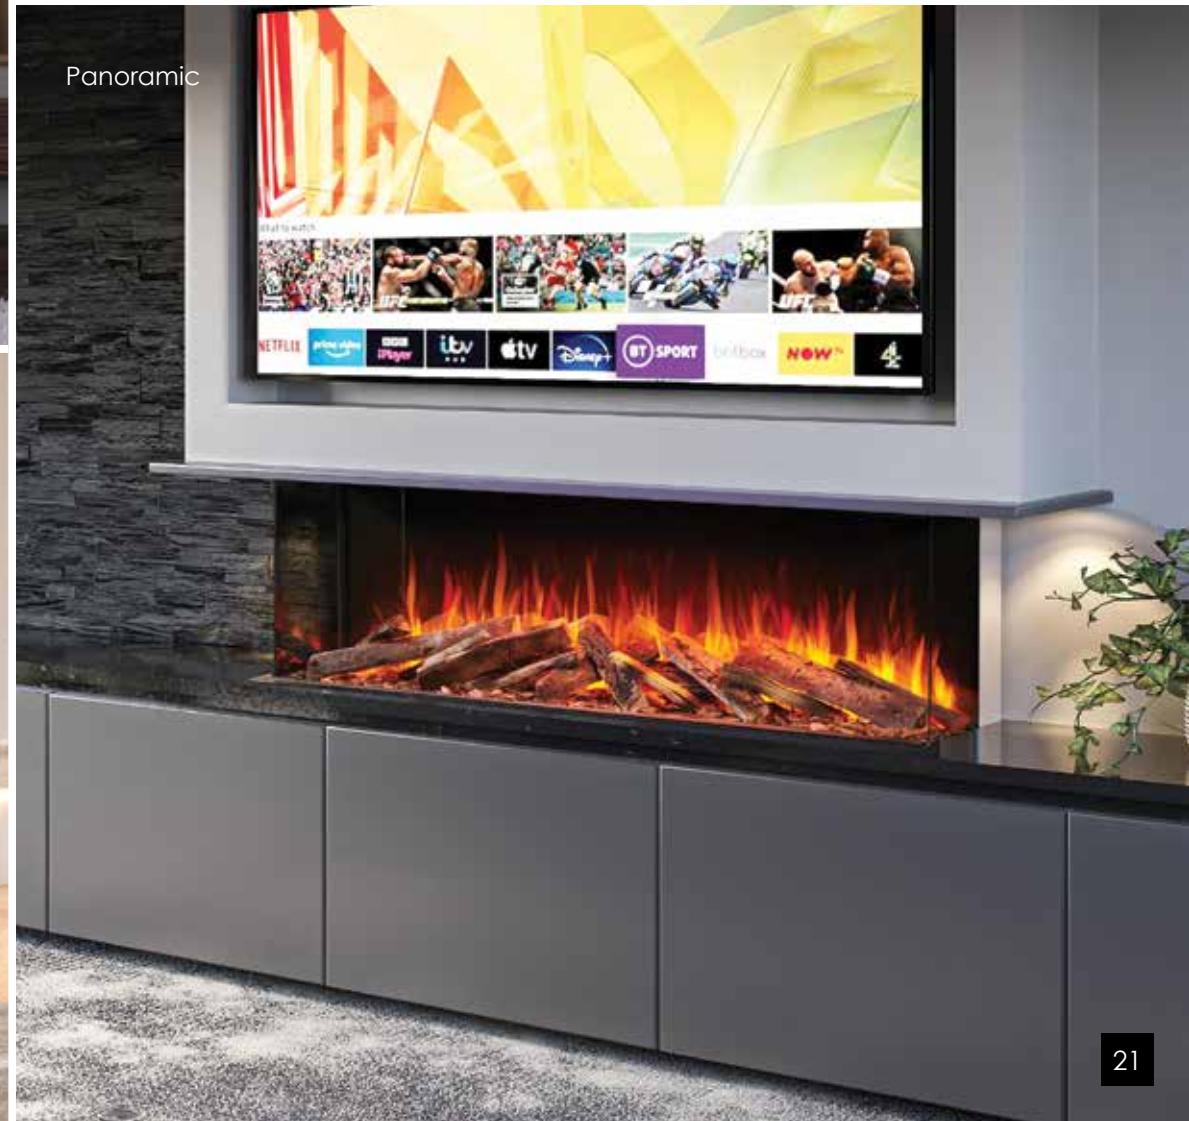

Corner

Front, Corner or Panoramic Options

Our clever 'one box solution' offers flexibility and versatility. All of our cassette fires including the LUX, SLE and etronic ranges can be fitted as either front facing, corner (left or right) or panoramic installations.

Panoramic

LUX Cassette Range

Features

- Ultra realistic, contoured flame effect technology
- Three flame speed settings
- Three flickering fuel bed options: **LUX** Premium Real Wood, **LUX** Woodland Effect Logs or **LUX** Silver Birch Effect Logs
- Customise the fuel bed with your own decorative pieces
- Multiple preset illumination themes and one custom setting
- Nine independent flame colours with adjustable brightness
- Nine independent fuel bed colours with variable brightness
- Nine independent downlight colours with pulse effect
- Ability to turn off flame, fuel bed or downlight illumination
- Crackling fire audio with 6 volume settings

Installation

- 'One box solution' for front, corner or panoramic views
- Plugs into a standard 13 amp 3 pin socket
- Thermostatically controlled with ultra quiet fan heater
- Seven day, twice daily, program settings

Energy Efficiency & Extras

- **Running costs from only 3p per hour***
- Fully ErP compliant & low energy LED flame effect
- Optional Anti-Reflective Glass available
- Two optional Scene Lighting kits with 10 colour options
- Optional 5 year warranty for added peace of mind

LUXPLUS⁺ Extra Wide Feature Fire

Create a 2.5m - 4m electric fireplace

Solution Fires have cleverly designed the **LUX** range of cassette fires so that they can be fitted side by side to create that extra wide WOW factor fire.*
For an enhanced visual appearance, we can provide a single front glass screen that removes the need for a central joint.

The following widths of fires can be achieved using the combination of fires:

2 x LUX125 = **2.5m Fire**

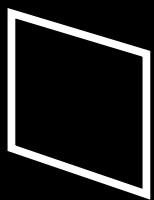

2 x LUX175 = **3.5m Fire**

2 x LUX150 = **3m Fire**

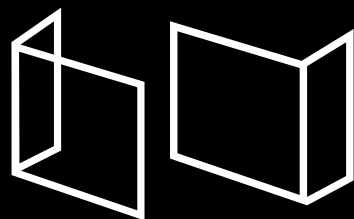

2 x LUX200 = **4m Fire**

**Fires order as pairs will come with special factory fitted side panels. A join in the rear flame screen will always be visible along with a gap between the two flame effects. Glass is a special order and will increase delivery times.*

LUX & SLE Suites

Made To Measure

All suites can be tailor made to your size requirements allowing you to create a truly bespoke installation that is perfectly suited to your space. Maximum sizes apply so we do recommend that you speak to your retailer to get more information about this service.

Colour Match

As part of our made to measure service, we can offer a colour match paint service. If you have a particular colour scheme in mind, you can either provide a swatch of your preferred colour(s) or you can tell us the brand and colour name so we can source the exact colour you want.

Home Entertainment Centre

We can help you create a bespoke home entertainment centre for your TV, soundbar and games consoles. Our chimney breasts can be made with recesses to suit all of your home entertainment items. Incorporate scene lighting to theme with movies or create a gamers paradise!

DIY Decoration

Suites can be supplied in a primed only finish if you would prefer to get creative, opting to paint or wallpaper the components yourself. Chimney Breasts are only available in a primed finish, come flat packed and certain fixing holes will require filling after installation.

Choose from the following finishes:

Solution Suites are available to order in a range of stylish standard and premium colours and materials.

Alternatively, we can supply your suite as primed only or colour matched to your own personal swatch. Speak with your retailer for more information.

SLE Inset Range

Our **SLE** inset fires are available in four different options. Featuring our realistic flame technology, these versatile and energy-efficient fires are an excellent alternative to gas or open fires.

Featuring a conventional canopy heater, the SLE40i is well suited to more traditional installations. For added effect, the SLE40i has been cleverly tapered to give the illusion of depth.

The SLE41i, SLE55i and SLE60i feature mirrored glass for an ultra-realistic flame effect. The slimline heater has been neatly disguised at the top of the flame screen so there is no need for a canopy. The SLE55i and SLE60i boast 22 inch fuel beds for added effect. The SLE41i and SLE55i both fit into a standard inset opening whereas the SLE60i will accommodate larger openings.

LUX150 / TrueFlame 150 3DX

Header Depth: 360mm/320mm **Hearth Depth:** 440mm/400mm **Base Depth:** 400mm/350mm

Where To Buy

The Solution Electric Fires range is distributed via our authorised dealer network. These independent retailers are able to give you advice on all aspects of your fireplace requirements from quotations to technical and installation services. For details of your nearest retailer, please visit our website at www.solutionfires.co.uk/where-to-buy

The Solution Warranty

All Solution Fires come with a standard 2 year warranty; year 1 includes parts and labour, year 2 includes parts only. Any fire purchased outside of our authorised dealer network will carry a 1 year non-extendable warranty. Standard 2 year warranty requires no registration.

For added peace of mind, we offer a 5 year Platinum Warranty Plan. To apply for the extended 5 year platinum warranty, please register your fire online at www.solutionfires.co.uk/warranty within 60 days of the purchase date.

Please visit our website for full terms and conditions.

Solution Fires is a division of **Capital Fireplaces Ltd**
